Chamber Size	512 Liter		Price	205000
--------------	-----------	--	-------	--------

FEATURES

1. Chamber Capacity 540 Liter for Laboratory : As per ASTM b 117 and ISO 9227 Standards
2. Chamber Size : L*W*H = 1200mm*750mm*600mm
3. Overall Size (Space Required For Machine) approx. : L*W*H = 1600mm*1100mm*670mm
4. Main Chamber PP, 12 MM Sheets
5. PP Top with Acrylic Transparent windows 5 MM
6. Auto Door open with 2 side pneumatic Clynders
7. Material Hangers 4 -6 Hanging Rods (Depending on Max. Job Size)
8. Main Water Tank Separated From Spray Chamber. Capacity 40 Liters.
9. Saline Solution Label Low in Reservoir Tank Indication at front panel.
10. Auto fill and label maintaining System for Reservoir Saline tank. Sensors available for maintaining water level between high and low levels.
11. Chamber Waste water Auto Drainage Control Systems. (No manual drain)
12. Compressed Air Circulation Periodically in Saline tank for dissolving residues.
13. Fully Automatic Temperature Controller double display for Heating of Water.
14. Temperature over Heat Warning Indicator on front panel.
15. Separate Temperature and Humidity Indicator for Chamber Temperature and Humidity.
16. Well Insulated Electric Shock Free, anti-Corrosion, Unbreakable Heaters (Life 10 Years/ No Glass Heater)
17. Fogging System Centralized as per ISO 9227 and ASTM B 117.
18. Standardized Fogg collection System as per ASTM B 117.
19. Automatic Fogg Operating System Controlled by Process Switch ON / OFF
20. Hour Meter 999 Hours 59.9 Minutes
21. Digital pH Meter with Sensor for Monitoring Online pH Value of Saline Solution
22. Digital Humidity Meter with Sensor to Monitor Humidity of Chamber.
23. Process Complete Buzzer Alarm with Indicator
24. Supply 220 VAc
25. Warranty 1 Year
